Academic Year 2021-22

Chronic Absenteeism Data

Methodology

The current report details the percentage of students who were chronically absent at the end of AY 2021-22. For chronic absenteeism calculations, absences were counted regardless of whether they were excused or unexcused. Students chronically absent, 10% or more days of the academic year, were only identified if they had been enrolled in ACPS for 20 or more days.

17%

Percentage of students chronically absent in AY 2021-22
