Old Business:

- None

New Business:

- Dr. Naglieri presented slides found [here](#).
- Dr. Naglieri shared that his test evaluates a person's ability to think, not what they already know. As a result, he feels that the Naglieri Nonverbal Ability Test (NNAT) is more equitable. Based on data that he has collected, there are not many differences in test scores between races and sex.
- He does not feel that his test is one that you can study for because it evaluates the way that you think.
